Guidelines for Authors

Abstract

The abstract should be italicised, Times New Roman 12points, single line spacing, justified, word count maximum 250. It should contain a brief introduction, research design, sample, problem statement, research question, methodology, data analysis, result, theoretical framework (if any) and conclusion. If it is an expository paper, it should contain a brief justification for the write up, the criticality of the issue being addressed to the field, theoretical justification, implications and novel idea you intend to generate – it could be in a form of proffering solutions, developing a model. Then draw a conclusion for the write up.

Keywords: List four or five keywords that are important to the article. Separate each word with a comma, the keywords should not be in bold and should be italicised.

Introduction/Background

Relevant background information about the article should be given in the introduction. It should also state how the article will be presented. Times new roman, 1.5 line spacing. . It should contain relevant literatures supporting the article. If there is a theoretical framework, it could be addressed connectedly as part of this subtitle or given a different subtitle. It should have an important relevance to the article and should be discussed as it is employed in the article not just reported from source.

Methodology

Give a capturing sub-title to this part of the article. Succinct information about the research design, sample, problem statement, research question, methodology and data analysis should be written interwovenly, not separated under different

subtitles. If there are figures and tables, include just the important ones. Tables with similar information could be merged. All tables and figures should be placed appropriately within text. Explanation should follow corresponding table or figure.

Results and Discussion

Summarise the results of the analysis and draw out significant findings. Discuss the results with relevant literature and draw meaningful conclusions.

Implication

From the conclusions drawn, bring out research implications.

Expository paper

It should contain a justification for the write up, the criticality of the issue being addressed to the field, theoretical justification, implications and novel idea you intend to generate – it could be in a form of proffering solutions, developing a model. Then draw a conclusion for the write up.
